

The background image shows a large-scale construction site during the day. Several multi-story buildings are under construction, completely encased in a dense network of metal scaffolding. A tall yellow tower crane stands prominently in the center. In the foreground, there are green trees and a blue and white fence. The sky is clear and bright.

# Coronavirus update: We are here to support our customers

**2nd April 2020**

At this time, it is natural for our customers to look at their key supply chain partners and seek to ensure continuity of supply. We have engaged with a large number of our customers who require our support and as a result put in place safer processes, that enable us to fulfil orders and minimise the impact on our product delivery. We will only carry on doing this where we are confident that we can safely operate, strictly observing Social Distancing guidelines. The health of our colleagues and customers is our top priority and we are committed to playing our part in preventing the spread of COVID-19.

To continue to provide you with the support you have been accustomed to, we have put measures in place to maintain the commercial and technical assistance that you need, using modern IT and online tools that we have available.

We know that the situation is changing every day and we will continue to adapt to meet your requirements, while ensuring the safety and wellbeing of our colleagues and partners.

We thank all our employees, customers and partners for their continued support.

**Aeon**
