

AA05/2

## SURFACE BOX FOR VALVE

### DN40 - DN300

Surface Boxes are designed for building in paths, roadway or non-surfaced roads to allow access to valves installed underground.

#### Application:

#### Design features

- Surface Box according to DIN 4056
- Load resistance class A15 (15 kN) according to EN 124-1

#### Technical Details:

##### Coating:

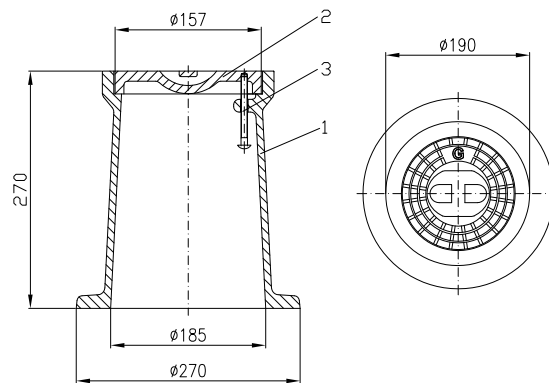

Asphalt coating for ductile iron surface box

AA05/2

| No | Part Name | Material                  |
|----|-----------|---------------------------|
| 1  | Body      | Grey Cast Iron EN-GJL-250 |
| 2  | Bonnet    | Grey Cast Iron EN-GJL-250 |
| 3  | Bolt      | Steel FeZn5 gr 5.8        |

| DN          | DN40-300 |
